Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (original): Sealing joint comprising an external metal casing (1) and a

flexible internal structure, characterised in that the internal structure is made of flexible

strips (8, 8a, 8b, 8c, 8d), overlaid and separated by supports (9, 9a, 9b, 9c, 9d), the

supports located on either side of the strips being staggered.

Claim 2 (original): Sealing joint set forth in claim 1, characterised in that some

of the supports, which touch the casing, extend under the projections (6) positioned on

an external surface of the casing.

Claim 3 (original): Sealing joint set forth in claim 2, characterised in that the

supports and the projections are linear.

Claim 4 (currently amended): Sealing joint set forth in any one of claims 1 to 3

<u>claim 1</u>, characterised in that the flexible strips are distinct, with a closed outline.

Claim 5 (currently amended): Sealing joint set forth in any one of claims 1 to 4

claim 1, characterised in that the flexible strips are homogeneous and separated by

intermediary blocks which act as supports.

Page 2 of 5

Claim 6 (original): Sealing joint set forth in claim 5, characterised in that it

comprises rings each of which bears the blocks located between a respective pair of

flexible strips.

Claim 7 (currently amended): Sealing joint set forth in any one of claims 5 or 6

claim 5, characterised in that the flexible strips are made in metal, ceramic or alloy with

oxide dispersion.

Claim 8 (currently amended): Sealing joint set forth in any one of claims 1 to 4

claim 1, characterised in that the flexible strips are corrugated, the contact between pairs

of waves creating the supports.

Claim 9 (currently amended): Sealing joint set forth in any one of claims 1 to 8

claim 1, characterised in that the supports are laid out in successive rows crossing the

joint through two support surfaces opposite the casing, the supports and the spaces

separating the flexible strips alternating in each row and from one row to another.

Claim 10 (currently amended): Sealing joint set forth in any one of claims 1 to

9 <u>claim 1</u>, characterised in that the flexible joints are concentric.

Claim 11 (currently amended): Sealing joint set forth in any one of claims 1 to

10 claim 1, characterised in that the flexible strips are circular and flat.

Appl. No. 10/542,254
Preliminary Amdt. Dated July 29, 2005
Reply to Office action of N/A

Claim 12 (currently amended): Sealing joint set forth in any one of claims 1 to 11 claim 1, characterised in that the supports radiate.

Claim 13 (currently amended): Sealing joint set forth in any one of claims 1 to 11 claim 1, characterised in that the supports are concentric rings with differing radii.
